

# European University Island Covenant

## I. General Information

The European University Island in the 3D-Virtual-World of Second Life® is dedicated to non-profit and educational use exclusively to provide a virtual environment for learning, teaching and science. All project partners on the European University Island agree with the exclusion of any commercial or for profit use of their rented land on the island.

## II. Land Renting

Minimum renting period for land on the EU-Island is one year. You can use the rented land after reconfirmation as project partner in written form by the german non-profit organization InfoForum Muenchen e.V., if you agree to the covenant and after full payment for one year by bank transfer or cheque. The contract will not be automatically prolonged.

## III. Liability

Land is provided as is to residents. The Owner of the European University Island is not liable for any networking problems on the side of the platform provider Linden Lab®. Please note, that the Second Life Platform is innovative cutting-edge technology and occasional temporary interruptions of the network availability (e.g. for updates) may occur. We can not guarantee a certain look, theme, frame rate, telehub location, location of the sim on the map or any other specific sim settings except for it being a PG rated sim for educational use.

## IV. Use of rented land

The European University project partner is using the rented land for himself, definitively no subletting, no subleasing and no sale of the land is allowed. Usage is limited exclusively to educational and non-profit use.

## V. Codes for preserving sim design and performance

### Building Code

- No malls, no shops or commercial usage
- No clubs, no listing of parcels as "gathering place"
- There is a sandbox on the island for the project partners and their students. No additional sandboxes, that are open for all SL-Users
- No obstructive signs, billboards or rotating prims
- No highrise structures. Max building height is 20 meters, we recommend 5 meters distance from the plot borders
- No buildings or signs used for commercial advertising
- No major eyesores
- No buildings, signs or images conflicting with the 'PG' rating of the sim (e.g. porn)

- To preserve a consistent landscape, no terraforming, exceptions are subject to prior approval by sim management
- Access restrictions to land only while land owner is present
- No visitors ejecting security orbs

#### Object Code

- No spy scripts: Scripts that spy on other residents, record or transmit chat, spy on avatar movement/activities are not allowed
- No scripts that transmit data directly or indirectly to external databases unless explicitly permitted by sim management
- No moving/rotating texture scripts
- No other high lag scripts

#### Conduct

- No harassment or stalking, especially no sexual harassment
- No discrimination against any user based on religion, national origin, race, color, or sex in Chat, IM or Voice
- No unconsensual player vs. player combat
- No weapons
- No littering of objects on other residents' land or on community land

#### VI. Languages

The administration of the sim can be contacted in English or German. Some members of our team are speaking Spanish and/or French.
